Commitment to Quality

Devatech put special emphasis on the quality of products, because we believe that it is the quality of the product that sells. In the present market, there is scarcity of reliable material and customers are ready to pay anything for a quality product. Under such scenario, we are fortunate to be preferred by our customers as their first choice. This is because of the international high quality standards of products that are available at most effective cost. To attain this recognition regarding the quality of our products, we have always worked in adherence to the quality policy of our company.

Quality Policy

- Sourcing the raw materials from reliable and reputed vendors only
- Supervising the entire manufacturing process at every level
- Incorporating the most advanced technology and infrastructure
- Employing only the most skilled and experienced professionals
- Maintaining engineering quality check practices
- Swiftly meeting to customers complain, if any.

Modern Infrastructure

Our modern and sophisticated infrastructural is the key for the quality standards of our products. We have invested a commendable amount of finance in order to acquire the most upgraded infrastructure. It includes all the requisite machineries, equipment and other arrangements. Along with our technical group effort and spacious manufacturing unit spread over a large area, Specially designed and developed imported machines are incorporated there. In addition to the manufacturing unit, we have designing department, R&D unit, quality checking unit and packaging unit also. In our quality checking unit, experts take care of analyzing the products through various engineering quality check practices. The designing unit is throughout involved in developing better models for our products.

With our Promoters' heading R&D department who are technosavy keeps Devatech Team researching about the new upcoming technologies. Once our experts qualify our products in the final quality check, they are stored in the warehouse.
